

Search for Dark Photons in the ATLAS Experiment and Future Prospects for Dark Matter Searches at the CEPC

Wednesday, 8 May 2024 14:00 (20 minutes)

This presentation will explore the physics potential study of dark matter searches at the Circular Electron Positron Collider (CEPC) and discuss the recent results in the search for dark photons in the ATLAS experiment at the Large Hadron Collider(LHC).

Collaboration (if any)

ATLAS and CEPC

Primary author: LIANG, Zhijun (IHEP, CAS)

Presenter: LIANG, Zhijun (IHEP, CAS)

Session Classification: 02 - 暗物质直接/间接探测实验

Track Classification: 02 - 暗物质实验: 02-1 - 暗物质直接/间接探测实验
