

Low Noise Readout ASICs for Astroparticle Physics Research

Wednesday 27 August 2025 18:00 (2 hours)

Introduction for some Low Noise Readout ASICs for Astroparticle Physics Research developed by institute of high energy physics,CAS. They can be used with SDD,Si-PIN,Ge,CZT,GEM and SiPM detector. And some of them can be used for polarimetry of X-ray or Compton imaging.

Collaboration you are representing

Author: WANG, Ke (Institute of High Energy Physics, CAS)

Presenter: WANG, Ke (Institute of High Energy Physics, CAS)

Session Classification: Poster session

Track Classification: Underground Laboratories – Technology
